

## bionection 2020

On 26th and 27th of February 2020 the *bionection – Partnering Conference for Technology Transfer in Life Sciences* will take place for the sixth time in a row. This year, the Central German life sciences industry meets in Leipzig to exchange about latest developments and future-gazing technologies in the areas of biotechnology and medical technology.

The program of the two-day conference includes panel presentations, a panel discussion, short pitches, workshops, the 1-to-1 business partnering, an industry exhibition and the presentation of cooperation offers from industry and networks.

The conference program of the bionection 2020 is structured around five theme panels:

- cell and immune therapy
- veterinary medicine
- diagnostics
- imaging and evaluation
- e-health

## What is bionection?

The bionection is the Central German industry meeting of biotechnology and medical technology.

The aim of the annual two-day bionection conference is to showcase innovations and applied research projects as well as technology offers and requests in order to attract potential business partners. Using a range of interactive formats, opportunities for collaboration in the fields of product-based development and commercialization are highlighted.

## Organizer

bionection is being hosted by **biosaxony**, the biotechnology & medical technology cluster for Saxony. The network bundles the forces of all partners, such as companies, research institutes, as well as industry stakeholders and suppliers, and represents their interests in politics and the public.

biosaxony's responsibilities include initiating projects between industry and research, pinpointing services and know-how, and highlighting regional expertise in order to support the productive development of these cross-cutting technologies. In addition, the support of young innovative companies is one of the main concerns of the network.

The development of new ideas and the expansion of a sustainable technology transfer, for example in the context of the annual partnering conference *bionection*, are further key areas of the cluster work. Local work is strengthened by biosaxony's offices in Leipzig and Dresden.
